

Assessment Tomorrow

Conference

e-Vocational - 2015

'Technology in Support of the Skills Agenda'

Thursday 19th November 2015 at the Hilton City Centre, Leeds

About this, the 8th e-Vocational Conference

This, the 8th e-vocational conference from Assessment Tomorrow, comes at a critical and challenging moment in the FE and skills sector. Developments include the pressure on budgets as well as the increasing use of technology enabled learning, assessment and qualifications.

The response to last year's FELTAG report was clear.

The conference speakers will develop the themes of

- how the emerging agenda is effecting learners, providers and Awarding Bodies,
- the ways in which the current landscape of technology enabled learning and assessment is changing how qualifications are designed, delivered, used and perceived,
- and how, in the current environment, the full benefits of technology (in the educational, operational and financial sense) can be balanced against the risk and investment required.

As in previous conferences, an expert set of speakers will discuss the issues and look at their experiences at delivering technology enabled learning and qualifications in the vocational, technical and professional sphere. They will examine the issues around how technology influences, enables and moulds the assessment and hence the learning process. This conference is an ideal opportunity to begin sharing and understanding the implications of these issues.

Venue:

Hilton Leeds City Centre, Neville Street, Leeds, LS1 4BX
Telephone: 0113 244 2000

Speakers include:

- Aim Awards
- Alphaplus Consultancy
- BTL Learning and Assessment
- Calibrand
- City and Guilds
- COELRIND
- College Development Network
- DigitalAssess
- For Skills
- Jisc
- Norwich City College
- Virtual College

The conference will be chaired by Dr Bob Gomersall, Chairman BTL Group and Virtual College.

Focus:

Speakers will examine the management, control, and organisation required for the effective use of e-Assessment and learning, and related technologies and techniques in Technical, Vocational and Professional Education, Training and Qualifications in the context of the current skills reviews and the post FELTAG world.

Gold Sponsor

Sponsors:
